 **PROACCURA**

## Secure Solutions Across the Continuum of Care

Regulatory Consulting • Managed Technology Services • Cloud Solutions and Hosting

At ProAccura, we understand the complexities of healthcare data and IT security. Our solutions help address challenges in the healthcare system along the continuum of care — from acute care environments to home care settings. We also understand the various gaps in healthcare information management today and our solutions are built to address them.

ProAccura is focused on enabling secure, clinically integrated care — through solutions that allow our clients to improve outcomes...reduce costs...increase access...and deliver more personalized care. All with the focus on regulatory compliance.

*“ProAccura has been instrumental to the success of our information technology initiatives. Hosting our disaster recovery solution in their secure, state-of-the-art data center not only provides us with peace of mind, but allows us to focus efficiently on our primary objectives in providing services to our clients. Their technical team is top-notch, and is a value-added resource of knowledge to our IT endeavors.”*

*- Eric Shaver  
Senior Vice-President Information Technology  
The Plateau Group, Inc.*

## HIPAA/HITECH Compliance Assured

Our valued healthcare clients have the advantage of ProAccura's in-depth experience working within regulated environments which helps us assess your HIPAA/HITECH compliance posture. By recommending best practices and policy development, ProAccura assists you in the protection of PHI while identifying potential government incentives related to best practices. ProAccura's compliance services include:

- **HIPAA Security/Privacy Survey** designed to assess compliance with the HIPAA Security & Privacy Rule Standards and Implementation Specifications.
- **Remediation Services** to appropriately address findings identified in the Survey Report.
- **Disaster Recovery and Business Continuity Planning Services** to fulfill requirements of the HIPAA Security Rule Recommendations on appropriate security measures outlined in HIPAA §164.306 security standards.

## Managed Services for Healthcare IT Solutions

ProAccura's Managed Technology Services provide leading healthcare IT solutions, managed by expert-class, certified IT professionals. By managing IT services that protect you and your patients, ProAccura insures an IT environment that is regulatory compliant without diminishing the quality of care.

- **Managed Security Services** – From Managed Firewalls to Intrusion Prevention Services and Virus Protection.
- **Technology Vendor Management Services (TVMS)** – A "One Call" solution for all of your technology vendor management.
- **Remote Management Services** – 24/7 monitoring and management of your server, desktop, mobile devices, and applications plus networking support for all of your systems.
- **Managed Offsite Backup Services** – Eliminate costly courier services while maintaining up to real-time data protection.
- **Managed Disaster Recovery and Business Continuity Planning Solutions** – ProAccura's holistic solutions protect and provide access to your patient and critical business information when you need it, even in adverse situations.
- **Colocation Services** – We also offer colocation for your computing resources in our secure data center with redundant power, utility and carrier access.
- **Managed Hosting Services** – Our trained staff can manage every aspect of your hosted IT infrastructure.
- **Web Hosting** – ProAccura can host your website in a multitude of environments including Linux, Windows, Apache, IIS, and more.

## Cloud Solutions

### Access Clinical Resources. Anytime. Anywhere.

ProAccura's Cloud Solutions feature 24/7 supported variations of contemporary Cloud implementations including standard, private, dedicated and hybrid.

- **Enterprise Cloud Backup** – ProAccura's Enterprise Cloud Backup offers a secure, high-performance, highly-available backup solution for your critical data.
- **Private and Secure Cloud Hosting** – We also offer secure Cloud hosting and applications (SaaS) such as EMR/EHR, Clinical Imaging, Microsoft Exchange + Outlook, SharePoint, Small Business Server and other clinical and back office systems.
- **Application Development and Delivery Platform** – We can help build the appropriate environment for your application developers.
- **Data Centers** – ProAccura's data centers are engineered to host any solution your practice may demand with our highly available SSAE16 facilities with multiple communications carriers and industry standard Service Level Agreements.

## **A Leading Provider of Managed IT Services and IT Security**

ProAccura, LLC is a Nashville, Tennessee-based IT consulting firm and managed IT solutions provider. Our goal is to deliver Information Technology, secure data center and Cloud hosting solutions. Compliance-intensive industries and firms including healthcare companies, banking, financial institutions, professional services firms and others benefit greatly from our services with reduced risk, cost savings and compliance assured.

ProAccura is committed to the success of your healthcare organization – now and in the future. The healthcare industry is facing the most dramatic time of change it has ever faced and you need partners that understand the challenges and opportunities associated with that change. ProAccura delivers comprehensive solutions with vision that enable hospitals, clinics, practices and doctors to use information technology strategically for competitive advantage, security and interoperability.
